

Bearded Men! Our Ridiculously Good Beard Oil Embraces the Dropout in You

FaceBush's lush, natural beard oil was formulated for men who break the mold. You don't need no stinkin' manmade chemicals fouling up your beard. You don't need mysterious beard products from China when there's something legitimately deserving of your attention being manufactured right here in the USA. You crave only the best for your face bush, and you'll wrestle a tiger or stomp through dense jungle brush to get your hands on it.

What sets The Dropout beard oil apart from the beard grooming pack is that it's not afraid to be different. We pulled out all the stops when we created this beard oil. We stubbornly refused to substitute cheaper oils or more inexpensive ingredients for the virgin argan oil, Vitamin E oil, and other costly natural oils we used. Count them! There are nine natural oils in our formula—enough premium ingredients to make an accountant weep.

We went one step further and scented this beard oil with the enticing scent created with a premium grade blend of fragrance oils. This is the good stuff. This is beard oil you covet and don't want to share. The beard oil that fosters the right environment for facial hair growth and healthy, supple skin.

Don't settle for less. Your face bush deserves The Dropout beard oil.
